

SECURITY MANAGEMENT FOR WORKFORCE DEVICES

BlueFletch Enterprise helps companies secure, manage, and support their rugged and shared workforce devices.

Designed for **Android**, BlueFletch is a powerful platform for **device lockdown and recovery, login/authentication, and user/device compliance** for device fleets in the retail, manufacturing, warehousing, logistics and healthcare industries, as well as government organizations.

BlueFletch Enterprise Key Features

Enterprise Launcher

A secure home screen replacement for corporate-owned dedicated Android devices that ties into all major Identity Providers and provides multi-user single sign-on (SSO) for web, mobile, legacy, and 3rd party apps

Support Agent

Integrated support tool that captures device-specific data to increase visibility and easily contact the help desk. View device battery health, network performance, app usage, and check-in/check-out data

Enterprise Installer

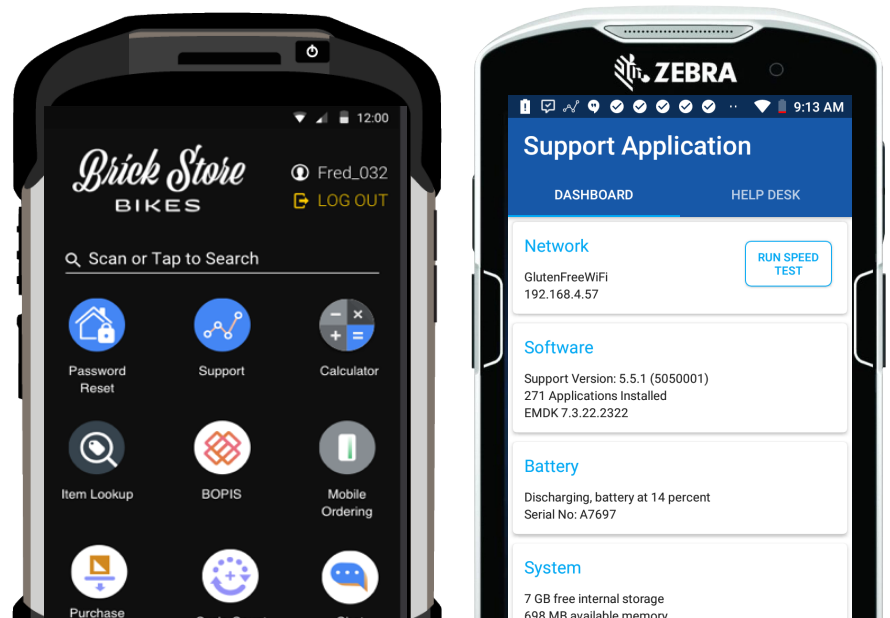

A Google-validated EMM, built to manage company-owned Android devices for dedicated use. Install configs remotely, manage business apps, and lockdown device features & settings to ensure functionality

Device and OS Support

Bluefletch supports Android 5.0-11 and functions on rugged and consumer Android devices.

Hardware supported include Zebra, Honeywell, Datalogic, Spectralink, Samsung, Motorola, Panasonic, Nokia, and more. BlueFletch Enterprise is a SaaS offering.

Benefits

Improve User Experience

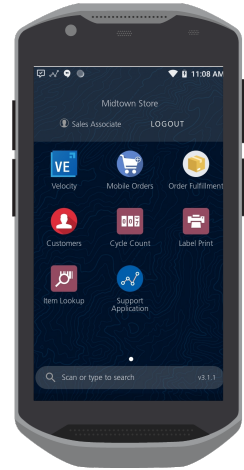

Faster login, Single Sign-on, Password Manager, and Re-authentication will save end-users time throughout their workday. Labor savings for typical clients exceed \$800 per year per device.

Strengthen Device Security

Integration into all common enterprise Identity Providers such as **Azure AD, Okta, SailPoint, Ping**, allows consistent enterprise security out-of-the-box.

Reduce Device Loss

Accountability of devices down to the user level allows managers and operation teams to locate lost devices and keep associates accountable for returning devices at the end of shifts.
