**Gamma Solutions selling the new Intermec SF61B Rugged 2D Mobility Scanner**

Melbourne July 31<sup>st</sup> 2013 – Traditional gun-shaped scanners weren't designed for the workforce on the go. Gamma Solutions introduces the Intermec SF61B a rugged, performance scanner that is the ideal tool for your mobile workforce with full-size scanning performance.

Designed to provide the highly mobile worker with performance scanning in an extremely compact and rugged package, the Intermec SF61B easily integrates with existing data capture workflows and with integrated Bluetooth wireless easily pairs with iOS (Apple iPhone and iPad), Android and Windows Mobile smartphones and tablets. With its unique form factor and magnetic quick-disconnect system, workers can accomplish their data collection tasks with more efficiency, safety and agility than ever before.

Despite its compact size, the Intermec SF61B packs the same high performance 2D imagers as our full-size handheld scanners. With unmatched motion tolerance (up to 500 in/sec) and omni-directional reading capability, it keeps up with your workers on the go by delivering incredible scan speed at any angle making this scanner a flexible data capture tool.

The robust scanning performance of the Intermec SF61B is complemented with equally impressive communication and battery performance. An integrated Bluetooth Class 1 radio enables wireless communication at ranges up to 100 m (325 ft), and the field-replaceable battery endures over 20,000 scans on a single charge. The Intermec SF61B offers performance characteristics commonly found in full-size scanners, at just a fraction of their size and weight.

**About Gamma Solutions**

Gamma Solutions Pty Ltd ([www.gammasolutions.com](http://www.gammasolutions.com)) is an Australian owned company, based in Melbourne, with offices in Sydney, Brisbane, Adelaide and Perth. Founded in 1992, the company provides all the components of mobile computing, RFID and data collection systems such as portable terminals, barcode scanners, barcode printers and wireless networks; as well as professional services including systems analysis, design and implementation, middleware software and training.
