Motorola's new MC9200: Industry's Fastest Handheld Device

Motorola launches industry's fastest handheld device the Motorola MC9200 the latest edition to their 9000 series which is considered the world's most popular industrial mobile computing series, with more than 2 million devices shipped over the last decade. The new Motorola MC9200 offers same signature rugged design, proven reliability and better investment protection

Motorola Solutions Inc. (NYSE: MSI), a leading provider of mission-critical communication solutions and services for enterprise and government customers, today introduced the most powerful industrial mobile computer available on the market, the Motorola MC9200. With a significantly faster dual-core processor, the new Motorola MC9200 is the next generation of the Motorola MC9000 series, is capable of supporting the latest mobile enterprise applications in demanding environments such as warehouses, loading docks and manufacturing shop floors.

The MC9200, the industry's fastest handheld computer, incorporates a dual-core OMAP4430 processor from Texas Instruments (TI), high-speed 802.11a/b/g/n Wi-Fi for better connectivity, greater storage and enhanced information assurance security with FIPS 140-2 cryptographic certification, taking application performance to a new level.

The MC9200 enables businesses to maintain backward compatibility with legacy warehouse management systems (WMS) and Telnet applications through Motorola's RhoMobile Suite, which helps protect application investments. The MC9200 is available with a wide range of scanning capabilities to fit customers' needs. In addition, all existing peripherals and accessories for the MC9000 series will be compatible with the new MC9200 including keypads, batteries and cradles – providing additional investment protection for customers.

About Gamma Solutions

Gamma Solutions Pty Ltd (www.gammasolutions.com) is an Australian owned company, based in Melbourne, with offices in Sydney, Brisbane, Adelaide and Perth.
