Gamma Solutions introduces the 70 series - the Answer to the Industry's Need for No-Compromise Rugged Mobile Computing

Melbourne January 13th 2011- Gamma Solutions is proud to announce the launch of the Intermec 70 Series, its next generation portfolio of ultra-rugged mobile computers, delivering unparalleled performance to maximise worker uptime and efficiency. Comprised of four products over one platform, the 70 Series nearly doubles Intermec's mobile computer portfolio in one release.

The Intermec 70 Series comprises four distinct products sharing a common platform and capabilities – the Intermec CN70 (field service, transportation and logistics), the Intermec CN70e (direct store delivery/route accounting), the Intermec CK70 (parcel delivery in courier, express and postal operations) and the Intermec CK71 (manufacturing and warehousing). All in the smallest and lightest form factors in their respective classes, each product is built to help businesses optimise resources to improve operational efficiency, support future growth, and deliver high customer satisfaction.

“The new Intermec 70 Series provides our customers with some exciting new technology such as the choice of either the new EA30 scan engine which is capable of scanning both 1D and 2D barcodes or the 3rd generation EX25 scan engine. The Intermec 70 Series also has both motion tolerance and an advanced aiming system which we believe will have great benefit to our customers” says Gamma Solutions National Sales Manager Paul Fleming.
