Aruba Networks AP-134 and AP-135 Access Points now available from Gamma Solutions

Melbourne April 29, 2011- Gamma Solutions have added the latest Access Points from Aruba Networks to the long list of Aruba Network products available from Gamma Solutions.

The AP-134 and AP-135 are indoor 802.11n Access Points which maximise the performance of mobility computers – be it handhelds, tablet PCs or vehicle mounted units – in extremely high density wireless environments; using integrated MACSec security the Access Points have strong threat protection.

The Aruba Networks AP-134 and AP-135 have three spatial streams to deliver 50% more throughput and support 50% more mobility devices compared with previous generation of access points. The APs are easy to configure using the Aruba Networks Mobility Controller to provide WLAN access with part time air monitoring for wireless IPS and spectrum analysis.

“Aruba have released great access points in the AP-134 and AP-135; it has many great features which our customers will find invaluable including secure enterprise mesh and wireless intrusion protection as well as spectrum analysis” said Gamma Solutions’ Technical Services Manager Clem Valdez
