### **Gamma Solutions introduce the TopVox TopSPEECH BlueMaster the next stage in Voice picking solutions.**

Melbourne May 3, 2011 – Gamma Solutions are pleased to announce the latest development from TopVox, market leader in Voice Technology; the TopSPEECH BlueMaster headset.

TopVox BlueMaster headset works with the TopSPEECH-Lydia innovative voice picking solution to improve the efficiency and safety by eliminating the cables normally used with the headsets.

The BlueMaster headset has audio broadband transmission to work with top-SPEECH-Lydia ensuring that the high quality of voice recognition is maintained. In this solution NoiseMaster from TopVox is also utilised to eliminate the background noise which can often hinder the process when other voice solutions are used. Using the NoiseMaster noise filtering system, noises above 94dB can be eliminated. Other features of the TopSPEECH-BlueMaster include the ability of the device to be worn on either side depending on your preference and weighs only 230g.

“The TopVox BlueMaster headset has many great features but I believe one of the best is the battery life” says Northern Region Sales Manager Glenn Batten, “The headset comes with a 750mAh replaceable battery which has between 15 and 20 hours battery life which is enough for 2 standard shifts.”
