Industry leader launches a new vehicle mounted computer

Melbourne March 7th 2012, the new Intermec CV41 vehicle mount computer is now available from Gamma Solutions; an industry leader in data capture technologies. The Intermec CV41 delivers the freedom and flexibility to work the way you want and is perfectly sized for forklift applications.

With its innovative on/off ignition sensing capability the CV41 is ready to work as soon as the operator turns the key. Downtime is further reduced with the user replaceable touch screen and keyboard assemblies as well as the unique quick mount dock design which allows for easy one handed docking and undocking of the CV41.

Able to operate in temperatures ranging from -30°C to 50°C the CV41 is adaptable for cold storage and freezer applications with its rugged construction IP66 sealing, glove compatible keyboard sizing and optional touch screen defroster.

“One of the great benefits of the CV41 is that it is able to be used across a variety of applications from cold storage environments to normal warehousing and distribution” says Northern Region Sales Manager Glenn Batten, “This allows companies to standardise the equipment they use throughout their entire operations, if a unit is offline in one area of the business they are able to get the same device from another department to do the job”

The Intermec CV41 comes with 1GB RAM as well as 1GB flash with a user installable expansion slot supporting an additional 1-4GB SD card. It also has a light sensor for automatic brightness adjustment and a backlit 64 key QWERTY keyboard with number pad and 10 function keys with all keys mappable. All of this makes make CV41 one of the most versatile vehicle mounted units on the market.

About Gamma Solutions

Gamma Solutions Pty Ltd (www.gammasolutions.com) is an Australian owned company, based in Melbourne, with offices in Sydney, Brisbane, Adelaide and Perth. Founded in 1992, the company provides all the components of mobile computing, RFID and data collection systems such as portable terminals, barcode scanners, barcode printers and wireless networks; as well as professional services including systems analysis, design and implementation, middleware software and training.
