Cisco 2500 Series Wireless Controllers by Gamma Solutions

Melbourne May 11, 2011 – Gamma Solutions today announced the arrival of the new Cisco 2500 Series Wireless Controllers to their list of products it can now deploy to its customers.

The Cisco 2500 Series Wireless Controllers are used to manage wireless functions in small to medium sized businesses as well as different branch offices and helps the Cisco Aironet access points communicate in real time to help simplify the wireless network.

There are many benefits to the Cisco 2500 Series Wireless Controllers such as the ability to have up to 50 access points and 500 clients connected at any one time, it has centralised security policies to detect rogue access points and it also utilises Cisco CleanAir technology for a self-healing and self-optimising network which can avoid RF interference.

“The Cisco 2500 wireless controller will be a great benefit to our customers as it simplifies their networks while still offering advanced security protocols to detect unauthorised access points” said Gamma Solutions’ Sales Executive Rick Major.

Gamma Solutions offer a large range of services relating to the Cisco wireless networks including site surveys, troubleshooting and installations as well as consulting, just to name a few. For a quote regarding Cisco wireless networks please contact us on 13000GAMMA (1300 042 662) or email our qualified sales team at sales@gammasolutions.com
