The Honeywell Thor VM2 Vehicle-Mount Computer.

Melbourne April 11th 2013, Gamma Solutions introduces the Honeywell Thor VM2, building on the best-in-class Honeywell Thor VM1 that was created specifically to address the unique challenges of supply chain applications.

Ideally suitable for warehouse, port and yard process automation, the Honeywell Thor VM2 introduces an additional form factor option granting greater flexibility which is emphasized by its 9.7" XGA display, programmable multi-function keys, and WLAN and WWAN connectivity. Available with both Microsoft Windows CE 6.0 and Windows Embedded Standard 2009 operating systems which is compatible with many industry standard terminal emulation and web browser applications including the popular Honeywell RFTerm™ TE.

The Honeywell Thor VM2 vehicle-mount computer is built for simple and easy application development and system integration. Comparatively equipped to reduce operator downtime and capital investment, the Honeywell Thor VM2 leverages the same platform and innovative features as the well-known Honeywell Thor VM1 vehicle-mount computer. Delivering laptop-like simplicity, the Smart Dock capability allows for the separation of the computer from the power supply empowering users to seamlessly migrate from vehicle to vehicle and reducing the required number of computers.

Further, the field-replaceable front panel enables single-tool touch screen repairs, which significantly minimizes downtime and maintenance costs resulting from wear and tear at the most common breaking point. Lastly, the power management settings that accompany the ignition control feature virtually eliminate dead vehicle batteries and the subsequent productivity losses.

About Gamma Solutions

Gamma Solutions Pty Ltd (www.gammasolutions.com) is an Australian owned company, based in Melbourne, with offices in Sydney, Brisbane, Adelaide and Perth. Founded in 1992, the company provides all the components of mobile computing, RFID and data collection systems such as portable terminals, barcode scanners, barcode printers and wireless networks; as well as professional services including systems analysis, design and implementation, middleware software and training. Gamma Solutions is committed to providing the highest level of customer service by providing good and services Australia wide as well as in New Zealand.
