Intermec SG20 now includes new imaging options

Melbourne July 15, 2012 – Scanning is all about speed and accuracy—so why hassle with scanners that just slow you down? Gamma Solutions introduce the Intermec SG20 2D imager featuring the industry’s fastest bar code reading technology, with more motion tolerance than competing devices.

Select between Bluetooth wireless for up to 10 meters of range (32.8 feet), or the simplicity of tethered (cabled) connectivity. Choose the scan engine matched to your needs: either 1D (linear), 2D with laser aimer, or 2D with LED aimer ideal for customer-facing applications. Now you can standardize on a single scanner family across your operation, while providing the right solution for your varied applications.

A variety of matching accessories, such as scan stands and holders, enable hands-free scanning and free up counter or desktop space. Regardless of the configuration, the entire Intermec SG20 line is priced for affordability and value.

The Intermec SG20 can be quickly and easily configured with Intermec's exclusive EasySet™ PC programming tool. In just a few clicks, this Windows-based utility can print programming bar codes for custom configurations. Adjust security settings, symbologies, beeper tone and volume, LED color – even set up advanced data-editing routines.

About Gamma Solutions
