Introducing the MC75A

Premium 3.5G Worldwide Rugged EDA

The next evolution in EDA power

Motorola's MC75A takes its place as one of the world's premier EDAs, offering a field proven rugged form factor that delivers more enterprise-class features and functionality than any other device:

- Most robust processing power in its class
- Most robust rugged specifications in its class
- Only device in its class to offer government grade security — FIPS 140-2 Level 1 certification
- Maximum connectivity options: broadband cellular connections outside the four walls with support for 3.5G HSDPA or CDMA EVDO Rev A; 802.11a/b/g for cost-effective connectivity inside the four walls; Bluetooth and IrDA
- Most robust data capture options: 3.2 autofocus color camera AND high performance 1D or 2D bar code scanner for capture of virtually any bar code, signatures, still images, videos and documents as large as 8.5 in. x 11 in., complete with fine print
- Most flexibility, offering 5 keypad options and an extensive accessories eco-system, including backward compatibility with all MC75 and MC70 accessories

The MC75A from Motorola.
Maximum features...maximum functionality...maximum value.
