PM23c A COMPACT ADDITION IN THE INTERMEC PM SERIES PRINTERS

Melbourne September 19th 2013 Gamma Solutions Introduces the newest and most compact addition to the PM Series mid-range industrial printer family: The Intermec PM23c. This new two-inch model shares the same best-in-class throughput, speedy deployment, and incredible reliability for uptime assurance—now in an all-new, more compact footprint ideal for space-constrained applications

A 2-inch (51mm), mid-range industrial printing solution, the Intermec PM23c is an extension of the Intermec PM43 and PM43c printer platform. The new model features an all-metal barcode label printer and is ideal for applications such as airline passenger services, manufacturing, and retail, including product labelling and food traceability.

The Intermec PM23c offers all of the same advanced capability of the Intermec PM43 and PM43c and boasts a full colour touch-screen with 10 languages, or an easy-to-use universal icon user interface.

This family of printers also offers a multi-lingual, intuitive web-based device management interface; both Wi-Fi- and CCX-Certifications; and optional Bluetooth connectivity. The Intermec PM23c also has Precision Print, enabling it to easily print small barcodes, text and images with pinpoint accuracy.

About Gamma Solutions

Gamma Solutions Pty Ltd (www.gammasolutions.com) is an Australian owned company, based in Melbourne, with offices in Sydney, Brisbane, Adelaide and Perth. Founded in 1992, the company provides all the components of mobile computing, RFID and data collection systems such as portable terminals, barcode scanners, barcode printers and wireless networks; as well as professional services including systems analysis, design and implementation, middleware software and training.
