Intermec Unleashes Improved Warehouse Productivity with New SR61ex Handheld Cordless Scanner

SR61ex Integrates Breakthrough Intermec Intellibeam EX25 Auto-Focus Technology, Delivering the First and Only Near-Far Area Imager in a Handheld Scanner

August 2007 – Gamma Solutions are proud to introduce the Intermec SR61ex, the first handheld cordless scanner to integrate Intermec's proprietary Intellibeam(TM) EX25 near-far area imaging technology. With its breakthrough auto focus capabilities, the Intermec SR61ex can read any kind of bar code -- from near or far -- enabling customers to improve warehouse productivity, consolidate devices and reduce total cost of ownership.

An ideal data collection companion for forklift-based warehousing applications, the rugged Intermec SR61ex improves productivity by extending the operator's scanning reach and flexibility. Paired with a vehicle-mount computer such as the Intermec CV30 or CV60, the Intermec SR61ex can read 1D, 2D, composite and postal codes, in any orientation, from six inches to 50 feet away.

Operators can seamlessly transition from scanning an object in their hands, to scanning a pallet high up on a rack, to capturing an image. Tightly integrated Bluetooth(TM) wireless communication ensures smooth data transmission to the host computer, and with no cables to manage, operator safety and efficiency is also increased.

The Intermec SR61ex joins the EX25-enabled Intermec CK31ex mobile computer released by Intermec earlier this year, expanding the opportunities for customers to deploy flexible and accurate scanning technology across their supply chain. Both products enable customers to meet their diverse scanning needs today while providing a ready tool for adapting to future operational changes.

The Intermec SR61ex delivers an array of benefits for warehouse operations, including:

- Omni-directional scanning -- no arm twisting or package moving needed to get a good read
- Improved reads at low angles -- easily captures top-shelf bar codes in narrow aisles
- Reads in low light conditions -- auto-illuminating feature scans accurately in dim light
- Easy to use in bright light -- on-board scope assists bar code targeting outdoors
- Reads damaged or obscured codes, including bar codes covered in plastic wrap

Built to withstand harsh operating environments such as multiple drops to concrete and hot and cold temperatures, the Intermec SR61ex is sealed against dirt and water. The scanner comes equipped with a long-lasting lithium battery that delivers more than 10 hours of use and is easily changed, minimizing downtime.

About Gamma Solutions

Gamma Solutions Pty Ltd (www.gammasolutions.com) is an Australian owned company, based in Melbourne, with offices in Sydney, Brisbane, Adelaide and Perth. Founded in 1992, the company provides all the components of a mobile computing, RFID and data collection systems such as portable terminals, scanners, printers, wireless networks, middleware software and implementation services. Gamma Solutions is an Intermec Honours partner, a Cisco systems registered partner and a member of the Oracle partner network.

Gamma Solutions is a company committed to providing quality, practical and flexible solutions to suit the needs of its customers
