the professional labeling software

NiceWatch Enterprise

Enterprise Series

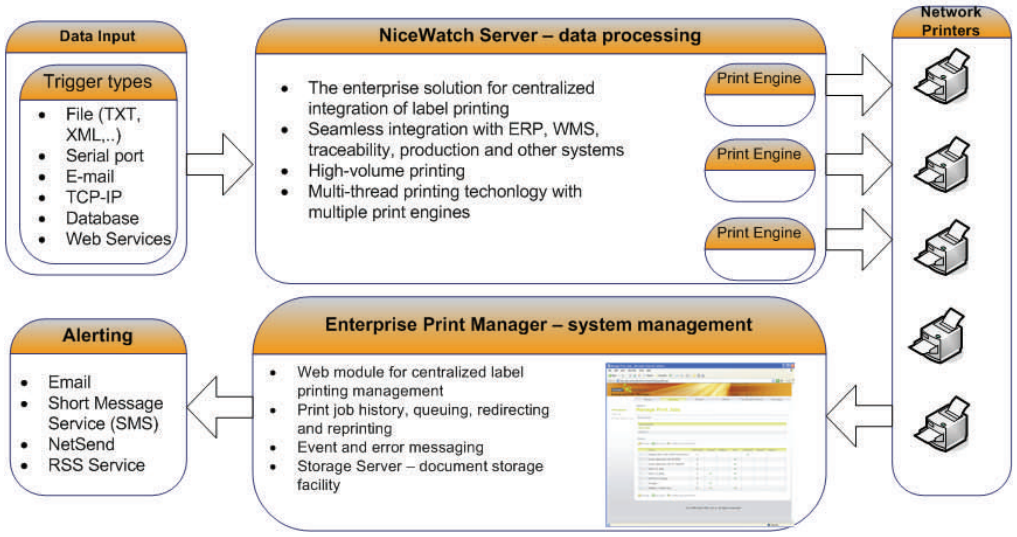
The enterprise solution for centralized integration of multi-threaded and high-volume label printing

If you print large quantities of bar code and RFID labels on multiple printers from your Warehouse Management System (WMS), Enterprise Resource Planning (ERP) system, Hospital Information System (HIS) or any other type of business information system, you face **complex and expensive integration challenges**. Additional challenges are how to manage, queue, redirect print jobs from a centralized location and achieve the highest output from your system.

NiceLabel's answer to these challenges is the **NiceWatch Enterprise**!

The NiceWatch Enterprise is an integration middleware server for high-volume label printing with centralized integration and print management.

NiceWatch Enterprise Workflow



The NiceWatch Enterprise product offers you:

- A multi-threaded printing technology that assures fast and faultless operation even in the most demanding environments
- Scalable enterprise-level integration middleware that does not require any programming or coding change of your existing information systems

The NiceWatch Enterprise offers you the following benefits:

- **Centralized high-volume printing** – multi-threaded printing technology designed for simultaneous printing on multiple printers
- **Quick integration** – easy implementation into all WMS, ERP and HIS environments like Oracle WMS, MSCA, SAP R/3
- **Complete advanced label design** – NiceLabel Pro label designer included
- **Remote administration** – centralized event triggering and monitoring from a remote location through the Enterprise Print Manager module
- **Multi-channel alert system** – learn immediately about status changes or problems with print jobs
- **NEW! Storage Server**— use any browser to access pre-designed labels stored in server-based document storage facility

NiceWatch Enterprise

Enterprise Series

Features and Benefits

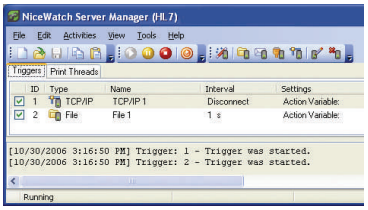
The NiceWatch Enterprise includes three main components:

- **NiceWatch Server**: A server-based enterprise production module for centralized integration of multi-threaded and high-volume label printing.
- **NiceLabel Enterprise Print Manager**: The enterprise module for server based printing, centralized document, printer and event management.
- **NiceLabel Pro**: Advanced label design software for professional bar code and RFID labeling on a local computer workstation.

NiceWatch Server | The high-throughput production module for enterprise-level centralized label printing integration

NiceWatch Server offers you the following:

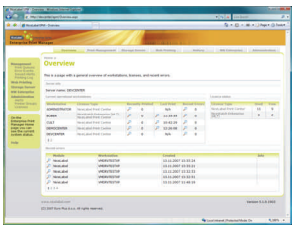
- Scalability: high-volume label printing through multiple engines to meet any printing frequency
- Robustness: reliable and faultless high-volume label printing, automatic print engine recovery
- Ease-of-use: easy installation and integration into existing enterprise systems
- Trigger options: file (XML, Oracle XML, etc.), serial port, email, TCP/IP, database and Web Services



Enterprise Print Manager | The enterprise module for remote printer, print queue, event and alert management

All printers in your organization can be managed from one location through the web-based Enterprise Print Manager module that is also part of your NiceWatch Enterprise environment. You access the Enterprise Print Manger through a standard web browser from any workstation on the network and perform operations like:

- Remote control over the label printing processes through the company's Intranet and the Internet
- Central print management – printer grouping and status, print queues, print job redirecting
- Logging functionalities – centralized logging of all the information on past print jobs, actions, errors, alerts and other events
- Multi-channel alerting and messaging services – configure email, NetSend, RSS feed and SMS to inform about label print status, warning and errors
- NiceWatch Server management and licensing
- Reprinting - reprint of all previously printed labels from various workstations
- Storage Server— server based storage repository allowing users to access all label related documents



NiceLabel Pro | The advanced label designer for professional bar code and RFID labeling

NiceLabel Pro enables you to do the following:

- Advanced bar code and RFID smart label design
- Visual Basic Scripting for robust data manipulation
- Download graphics and fonts for thermal printers with the NiceMemMaster module

Server Requirements (Enterprise Print Manager)

- MS SQL Server 2000 or higher; MS SQL Server Desktop Engine (MSDE); MS SQL Server 2005 Express
- MS Windows 2003 Server with SP1 or higher
- Microsoft .NET Framework Version 2.0
- IIS 5 or higher
- At least 512 MB RAM and 2 GB free disk space

Server Requirements (NiceWatch Server)

- 32-bit or 64-bit Windows 2000, XP, 2003 or Vista
- At least 128MB RAM
- 250 MB free disk space
